Berlin

Subject: Junior Web Developer, HTML, JavaScript, CSS , Node.js , Express.js, MongoDB, (GIT & VSCode)

Dear Mr. Marcel Schadt,

It is my pleasure to write to your esteemed company, I hope this letter finds you well.

As I have finished my one-year intensive course at the DCI Digital Career Institute in Web Development on the 11th of July. I am searching right now for a new challenging position as a junior full stack web developer in the hopes of expanding my on-the-job experiences and improving my skill-set for further refinement.

I have seen your job offer through LinkedIn, and I am glad if I can get the opportunity to work for an esteemed company like yours, especially to see that it will be a high chance to have a strong learning curve there as a junior. That gives me motivation and belief in long term work with your company.

My web development course's focus is primarily on Front-end technologies like HTML, CSS, JavaScript, React, npm, bootstrap, AND Back-end technologies like Node.js, Express, EJS, MongoDB.

I am a good team worker and like to engage with other developers that are ambitious when it comes to contributing to the companies' success. Moreover, I am also well-organized, a fast learner, and open to constructive feedback to grow as a developer.

Thank you for your time and consideration.

I am looking forward to hearing from you soon.

Please find attached a PDF file of my CV.

Sincerely,

Mohamed Salim Al Barry
