Subject: Junior Web Developer, HTML, JavaScript, CSS

Dear Ms. Bergmann,

It is my pleasure to write to your esteemed company, I hope this letter finds you well.

As I am going to finish my one-year intensive course at the DCI Digital Career Institute in Web Development on the 11th of July. I am searching right now for a new challenging position as a junior full stack web developer in the hopes of expanding my on-the-job experiences and improving my skill-set for further refinement.

I have seen your job offer through internet search engines, and I am glad if I get the opportunity to work for an esteemed company like yours, especially to see the benefits that your esteemed company offers to its employees. That gives me motivation and belief in long term work with your company.

My web development course's focus is primarily on Front-end technologies like HTML, CSS, JavaScript, React, npm, bootstrap, AND Back-end technologies like Node.js, Express, EJS, MongoDB.

I am a good team worker and like to engage with other developers that are ambitious when it comes to contributing to the companies' success. Moreover, I am also well-organized, a fast learner, and open to constructive feedback to grow as a developer.

Thank you for your time and consideration.

I am looking forward to hearing from you soon.

Please find attached a PDF file of my CV.

Sincerely,

Mohamed Salim Al Barry
